SKILLS

Languages: Python, JavaScript

Backend: Django, Django REST Framework, FastAPI, REST API Development

Frontend: React.js, HTML, CSS

Database: MySQL

PROJECTS

Code Flow Visualizer – Python Full Stack Application

Tech Stack: Python, Django, React.js, MySQL

Description: A full-stack web application that allows users to upload Python codebases and automatically visualize execution flow. The system performs static code analysis to identify entry points, file dependencies, function calls, and API routes, presenting results as interactive diagrams.

Features:

- Upload and analyze Python codebases using static analysis
- Automatic detection of entry points, function calls, and dependencies
- Interactive visual flow diagrams representing execution paths

Task Manager API – FastAPI Backend Project

Tech Stack: FastAPI, Python, MySQL

Description: Developed a RESTful backend service using FastAPI with async request handling and structured API design. Implemented CRUD operations and validation to simulate real-world backend workflows.

Features:

- Async API endpoints for task management
- Data validation using Pydantic
- CRUD operations with structured responses
- Error handling and modular backend design

Job Aggregation Platform – Full Stack Application

Tech Stack: Python, Django REST Framework, BeautifulSoup, React.js, MySQL

Description: A full-stack application that aggregates job listings from multiple portals into a single platform. Backend APIs scrape and process job data while the frontend displays searchable and filterable listings.

Features:

- RESTful APIs for job scraping and retrieval
- Automated data extraction using BeautifulSoup
- Search and filtering by role, location, and experience

EDUCATION

B. Tech in Electronics & Communication Engineering

Centurion University of Technology and Management, Vizianagaram

2021 – 2025 | CGPA: 8.6
