SUMMARY

Results-driven Fresher Python Developer seeking an entry-level Backend Developer role. Strong experience in Python, FastAPI, RESTful API development, and MySQL. Developed scalable backend systems including a Generative AI Resume Analyzer and Task Management API. Skilled in asynchronous programming, API design, data validation, and database integration. Eager to apply problem-solving skills and contribute to real-world software development.

SKILLS

Programming Languages: Python

Frameworks: FastAPI, Django REST Framework

Backend Development: REST API Developments

Databases: MySQL, MongoDB

Core Concepts: OOP, Data Structures

Tools & Technologies: Git, GitHub, Postman

PROJECTS

AI Resume Analyzer - FastAPI

Tech Stack: Python, FastAPI, OPENAI API

- Designed and developed a **Generative AI-based application** to analyze unstructured resume data
 - Built scalable **RESTful APIs** for real-time resume processing and feedback generation
 - Implemented **OpenAI API integration (LLM)** for intelligent insights and job role recommendations
 - Applied advanced **prompt engineering techniques** to improve response accuracy and relevance
 - Extracted and transformed **unstructured text into structured insights** (strengths, weaknesses, suggestions)
-

Task Manager API – FastAPI Backend Project

Tech Stack: FastAPI, Python, MySQL, Pydantic

- Developed a scalable **RESTful backend service** using FastAPI with **asynchronous request handling**
- Implemented full **CRUD operations** for task management with proper API structuring
- Used **Pydantic models** for data validation and request/response schema enforcement
- Integrated **MySQL database** for persistent storage and efficient data retrieval
- Implemented **error handling, status codes, and structured API responses** for robust communication

EDUCATION

B. Tech in Electronics & Communication Engineering | 2021 - 2025 | CGPA: 8.6

Centurion University of Technology and Management, Vizianagaram, Andhra Pradesh
