SUMMARY

Results-driven Fresher Python Developer seeking an entry-level Backend Developer role. Strong experience in Python, FastAPI, RESTful API development, and MySQL. Developed scalable backend systems including a Generative AI Resume Analyzer and Task Management API. Skilled in asynchronous programming, API design, data validation, and database integration. Eager to apply problem-solving skills and contribute to real-world software development.

SKILLS

Programming Languages: Python, JavaScript

Frameworks: FastAPI, Django REST Framework

Databases: MySQL, MongoDB

Core Concepts: OOP, REST APIs, Async Programming, API Security Fundamentals

Tools & Technologies: Git, GitHub, Postman

PROJECTS

AI Resume Analyzer

Tech Stack: Python, DjangoRestFramework, OPENAI API

- Built a scalable backend system using FastAPI to process unstructured resume data
 - Applied prompt engineering techniques using OpenAI APIs for intelligent resume analysis
 - Designed structured output models to improve decision-making and user experience
 - Implemented input validation and secure handling of user data
 - Focused on performance optimization and reliability of API responses
-

Task Manager API – Backend Project

Tech Stack: Django, Python, MySQL, Pydantic

- Developed RESTful APIs using FastAPI with asynchronous handling for scalable performance
- Designed CRUD operations with strong data validation using Pydantic
- Integrated MySQL database with optimized queries for efficient data retrieval
- Implemented structured error handling and consistent API responses
- Followed modular architecture aligned with SDLC practices

EDUCATION

B. Tech in Electronics & Communication Engineering | 2021 - 2025 | CGPA: 8.6

Centurion University of Technology and Management, Vizianagaram, Andhra Pradesh
